Social Responsibilities

FSC™ FSC™(Forest Stewardship Council)™ certificate is a voluntary, market-based tool that supports responsible forest management worldwide. The FSC™ label ensures that the forest products used are from responsibly harvested and verified sources.	
PEFC PEFC (Programme for the Endorsement of Forest Certification) is the world's largest forest certification program to ensure that timber and non-timber forest products are produced with respect for the highest ecological, social and ethical standards.	

International Standards

ISO9001 ISO9001 (International Organization for Standardization) is a quality management system that ensures manufacturer can demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements.	
ISO14001 ISO14001 (International Organization for Standardization) specifies the requirements of an environmental management system (EMS) to establish a systematic approach to deal with environmental aspects of an organization to properly control the impact of its activities, products and services on the environment.	

Manufacturing

GSV GSV (Global Security Verification) program is the leading international business network for supporting the development and implementation of measures in processes, procedures and infrastructure for enhancing global supply chain security and ensure products loaded and shipped can fulfil the C-TPAT requirement (Customs-Trade Partnership Against Terrorism).	

Testing & Safety

CNAS CNAS (China National Accreditation Service for Conformity Assessment) is the national accreditation body of China responsible for the accreditation of certification bodies, laboratories and inspection bodies. The accredited scope includes 8 soluble heavy metals and lead testing on toy products.
